**FASTEST WAY TO CLEAR MOSQUITOES FROM YARDS --
NEW ALLCLEAR MOSQUITO MISTER**

Reduces Biting Mosquitoes by More Than 90% for as Long as 6 Hours!

DALLAS / BOSTON (April 27, 2009) – Homeowners across America can finally enjoy their backyards this summer without the annoyance of biting insects. Universal Pest Solutions, LP, manufacturer of insect control products, introduces the ALLCLEAR® Cordless Mosquito Mister (www.allclearmister.com), the first portable insect misting technology that in just three minutes, controls mosquitoes and other nuisance insects in an area of up to 2,000 square feet for as long as six hours. Based on professional mosquito control technology, the ALLCLEAR Mosquito Mister is the perfect solution for homeowners who want an immediate, proven-effective, and convenient way to enjoy their outdoor living areas without the annoyance of mosquitoes.

The ALLCLEAR Cordless Mosquito Mister offers on-demand, anytime mosquito control in any backyard. Users simply wheel the cordless Mister into the area they want to protect and activate. The Mister dispenses an atomized mist solution of water and ALLCLEAR Mosquito Mister Concentrate for three minutes into the desired area of protection. The mist solution kills mosquitoes and other biting insects on contact and then creates an invisible barrier of protection from mosquitoes, including the Culex species that may carry and transmit West Nile Virus. Each three minute mist application protects an area of up to 2,000 square feet for as long as six hours. The Mister is cordless and can be easily repositioned or moved to another area of the yard for additional insect coverage.

“Our goal is to equip people with innovative products that effectively control mosquitoes and other outdoor insects,” says Jim Mills, president, Universal Pest Solutions, LP. “We recognized there was no existing insect control technology that offered immediate results with maximum convenience and ease of use. With our ALLCLEAR Cordless Mosquito Mister, after just three minutes, people can enjoy their yard when they want, for as long as they want, without the bother of mosquitoes.”

In tests conducted by independent entomologists for Universal Pest Solutions in backyards throughout Dallas and Houston, Texas, together the ALLCLEAR Mosquito Mister and ALLCLEAR Concentrates reduced biting mosquitoes by more than 90% in an area of up to 2,000 square feet for as long as six hours.

-more-

“The backyard studies conclude that the ALLCLEAR Mister is very effective at controlling mosquitoes in a designated area for long periods of time,” comments Bill Donahue, Ph.D., CEO/Laboratory Director, Sierra Research Laboratories. “Unlike backyard mosquito control products that can take weeks to see results or other options that may operate when not really needed, the ALLCEAR Cordless Mosquito Mister technology affords users immediate insect relief where and when they need it most.”

ALLCLEAR Mosquito Mister Features:

Designed with ease-of-use, convenience, and secure operation in mind, the ALLCLEAR Cordless Mosquito Mister offers:

- Cordless, wheeled design for easy mobility and placement anywhere in the yard
- Long-lasting, rechargeable battery
- Remote control starter for activation at a distance
- Smart Control Panel to monitor and activate Mister
- 12-second audible countdown prior to mist cycle
- Durable, weather-resistant materials making it a smart choice for season-long insect protection

ALLCLEAR Mosquito Mister Concentrates:

The ALLCLEAR Cordless Mosquito Mister operates exclusively with ALLCLEAR Mosquito Mister Concentrates. Consumers can choose the botanical Pyrethrum concentrate which is derived from dried chrysanthemum flowers or its synthetic equivalent which contains Permethrin. Each bottle of concentrate provides up to 25 three-minute mist applications, lasting most users a month or more of protection per bottle. Pyrethrum has been used for centuries and is one of the most widely used all-around insecticides. Botanical and synthetic Pyrethrins are used in nearly every category of insect control and are frequently used in a variety of household products such as human head-lice shampoo, indoor foggers, and pet flea sprays.

The ALLCLEAR Cordless Mosquito Mister and ALLCLEAR Mosquito Mister Concentrates are sold separately. The ALLCLEAR Mister has an MSRP of \$499.00. The ALLCLEAR Concentrates have an MSRP of \$29.99 per bottle. ALLCLEAR products are available nationwide at select Ace, True Value, and independent hardware stores and online at www.frontgate.com. For more information visit www.allclearmister.com.
